

HELP US ENSURE THAT OUR DIGITAL TOOLS ARE USEFUL AND IMPACTFUL

The UNDP Natural Resource Management Hub (NRM Hub) will be home to a range of support tools designed to help policy makers, civil society organisations, and other stakeholders employ evidencebased decision-making when it comes to managing natural resources and sustainable livelihoods in Papua New Guinea. This is why we are conducting user research (UX) research to ensure the NRM Hub meets user needs and helps secure a resilient future for the region's people and environment.

WHAT IS UX RESEARCH?

It is an interactive process that uses a variety of investigative methods to better understand the user's (your) needs during the development of a product or service.

HOW TO GET INVOLVED?

If you are working in the field of natural resource management in PNG, please follow the link or scan the QR code and participate in our UX review by sharing your expertise and experience with us.
